Good project portfolio management must be able to cope with constant change in the economy, society, and the environment.

In the 10th Multi-Project Management Study, we therefore examine with you how companies can increase their economic, ecological, and social success through effective project portfolio management:

**Economic success** combines long-term viability with entrepreneurial orientation in the project portfolio.

**Ecological success** means not only prioritizing sustainability through specific projects but embedding it in the multi-project management system.

**Social success** means promoting key people and their cooperation and thus increasing project management competence.

**Your benefits of participation**

- Individual benchmark report comparing your results to the study’s top and low performers
- Analysis of your project portfolio management regarding the focus topic future preparedness
- Analysis of established success factors of project portfolio management
- Free **participation**, the survey starts at the end of June and will remain open until the end of the year
- User conference on November 25th, 2022, presenting the results, best practices and expert talks
The 10th Multi-Project Management Study is dedicated to the topic of future preparedness, and we would like to invite you to participate!

For more than 15 years, our research group at the TU Darmstadt and TU Berlin has been investigating critical success factors of managing project portfolios through regular benchmarking studies. In previous studies, we analyzed over 700 companies with a combined portfolio volume of more than 150 billion Euros.

Now, you have the opportunity to contribute to the scientific study of corporate future preparedness! To do so, register for the study here. The survey starts at the end of June 2022. We are very much looking forward to your participation and hope that your multi-project management will benefit from our benchmarking as many have before.

Prof. Dr. Alexander Kock
Prof. Dr. Dr. Hans Georg Gemünden

Prof. Kock and Gemünden have published more than 200 scientific articles on project portfolio management and related topics, for which they have received various Best Paper Awards, the IPMA Research Award and the IPMA Achievement Award. Twelve successful doctoral theses have already resulted from their previous multi-project management studies.

Target group
Large and medium-sized companies with at least 20 projects to be managed simultaneously. We address project portfolio coordinators (e.g., portfolio managers, program managers, PMO managers) and portfolio decision-makers from business, division, and departmental management.

Your contribution
Three different questionnaires that can be conveniently completed online by different groups of people (1 coordinator, 1 decision maker, optionally three project managers). The total effort per portfolio is 2-3 person hours. Comparative participation of several portfolios within one company is possible.
